# HYBRID CORNS

High Germination. Treated. 1-bu. Cotton Bags Included  
 5-Bus. Lots, 25¢ Per Bus. Less. Quart, 2 lbs., postpaid, 90¢  
 Good Quality Round Grades \$2.50 Bu. Less

The terrific drought last summer caused an acute shortage of seed corn throughout the South, open pollinated and hybrid. The intense heat and drought seriously hindered pollination of hybrid seed production fields, causing a high per cent of large round grains, many barren cobs, and very little good flat grains of Southern adapted hybrids. The Extension and all Agricultural Agencies are intensively educating Southern farmers to plant rounds. In case we sell out of flats of your first choice hybrid before receiving your order, please permit us to ship rounds, or flats of another hybrid similar in performance and adaptation, before these also sell out.
